

# AIM MFG. & SUPPLY LLC

The AIM A2X Manway Gasket accommodates common problems with 20" tank car manways. Its elastomer properties offer memory use after use. Easily seals uneven, rough seating surfaces with low bolt loads. This unique design is available, but not limited to Nitrile, EPDM, & FKM (Viton®, Fluorel®) Our seals are manufactured and supplied in house to meet your needs & compounds to meet your chemical transportation requirements.

The AIM A2X Dome Gasket meets the Association of American Railroads' Manual of Standards and Recommended Practices Specifications for tank cars. The A2X gasket is for Standard Manway Covers on private, as well as railway company tank cars.

## The Channel Gasket Design of the AIM A2X offers several advantages:

- Tighter contact seal
- Increased safety
- Self centering
- Will not drop into tank like a flat gasket
